

ENVAULT HOSTED PROTECTION SUITE FOR SME'S

NEED FOR PROTECT, MONITOR AND CONTROL INFORMATION

SME companies share the same business needs to protect their information assets like the large corporations. However, the capabilities to make it reality differ drastically. Lack of resources, outsourced IT, lack of skills etc are all real life reasons why this important issue too often remains to be not taken care of by smaller companies.

AUDIT TRAIL GIVES YOU VISIBILITY

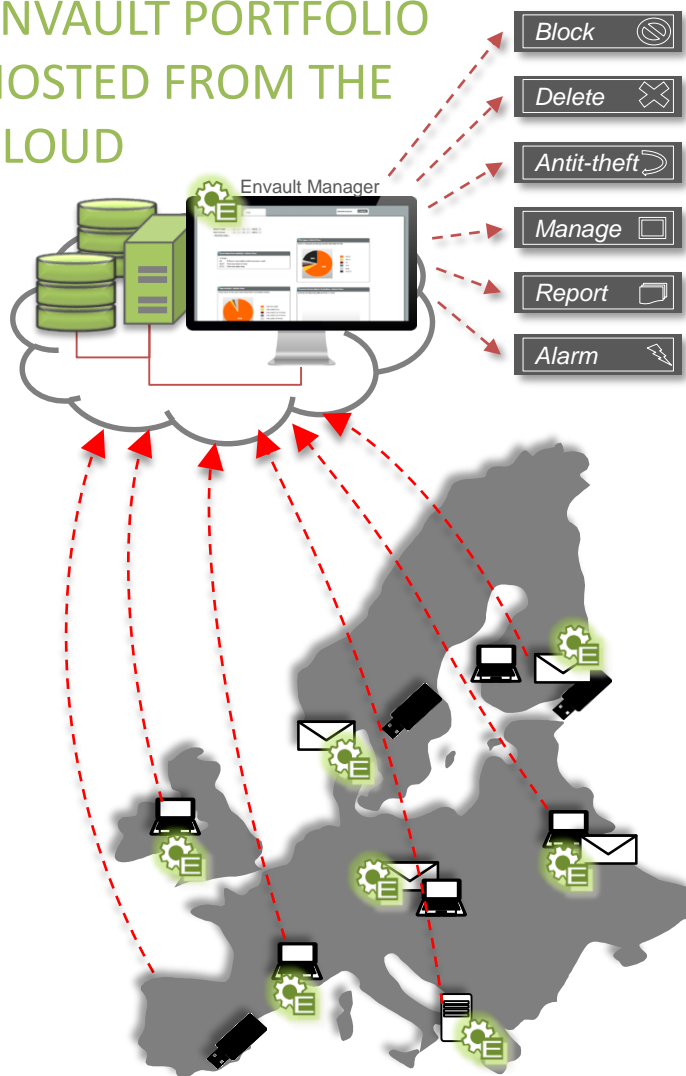

Envault provides a full set of useful data protection tools designed to meet the needs of SME's. The audit trail is a built-in feature, any access and transaction to protected device, data, cloud is included to Audit Trail which is always up-to-date and visible at the Envault Manager.

MANAGEMENT AND CONTROL

Envault provides a full set of useful data protection tools designed to meet the needs of SME's.

Our solutions enable **sharing data confidentially also with 3rd parties**, still the control over the data remains with the company. No special hardware or actions are needed, the solution works transparently on the background.

ENVAULT PORTFOLIO HOSTED FROM THE CLOUD

ENTERPRISE GRADE SOLUTIONS TAILORED FOR SME'S

Built-in Audit Trail and Central Control for Data and Device management

Protection for External and Internal Devices (hard drive, folder), Email, Cloud Storage

Efficient, easy-to-use protection (AES256 + Envault = Double Guard Technology)

Hosted from the cloud near you.

HOW TO GET IT ?

Envault's products are available as a hosted service, no on-site servers are required. We have put lot's of effort to make also the deployment so easy that no special knowledge nor skills are required in order to take our products in to use, the only thing you need to do is to start up Envault installer on the workstation you want to protect.
